

Serum Preset Installation Guide

MAC AND WINDOWS

Start here

1. Unzip your LP24 Audio download.
2. Open Serum on an instrument track in your DAW.
3. Choose the section below that matches your files.

Serum 2 packs SerumPack files

1. Choose Menu → Import Preset Pack.
2. Select your .SerumPack file and follow the prompts.
3. Open the preset browser and select your pack.

Serum 2 presets SerumPreset files

1. Choose Menu → Open Serum 2 Presets Folder.
2. Open Presets → User. Copy your LP24 Audio folder of .SerumPreset files here.
3. Choose Menu → Rescan Folders on Disk. Select your sounds from the preset menu.

Serum 1 presets fxp files

Serum 1 uses .fxp files. For .SerumPreset or .SerumPack files, use Serum 2.

1. Choose Menu → Show Serum Presets Folder.
2. Open Presets → User. Copy your LP24 Audio folder of .fxp files here.
3. Choose Menu → Rescan folders on disk. Select your sounds from the preset menu.

Default folder locations

Use the menu steps above to find your folder if it is in a different location.

Mac — Serum 2

/Library/Audio/Presets/Xfer Records/Serum 2 Presets/

Mac — Serum 1

/Library/Audio/Presets/Xfer Records/Serum Presets/

Windows — Serum 2

C:\Users\<your name>\Documents\Xfer\Serum 2 Presets\

Windows — Serum 1

C:\Users\<your name>\Documents\Xfer\Serum Presets\

Need a quick fix

Sounds missing? Rescan folders and clear browser filters.

Preset will not load? Update Serum and check the required version.

Extra sound folders included? Follow the instructions supplied with your pack.
